

# SPACESAVER<sup>®</sup>

Big Performance in Small Spaces

**Don't let its size fool you.**

It's the blender that makes itself scarce. Offering all the famous Blendtec power and functionality, the SpaceSaver is the low-profile option for space-challenged countertops.

# SPACE SAVER®

Big Performance in Small Spaces

## World-class performance in a small package.

When it comes to valuable real estate, the countertop is king. The SpaceSaver can be placed on the counter or installed in the countertop, occupying a mere few square inches of counter space.

## Power, speed, consistency.

With a powerful motor and simple one-touch operation, your SpaceSaver will serve up menu items more quickly and consistently than other blenders.

## More menu items for even greater profit.

Compatible with all standard Blendtec jars, the SpaceSaver lets you expand your menu offerings in a single sweep. Make anything from fresh hummus to delicious smoothies to incredible margaritas and more! Plus, you can create your own custom blend cycles on your computer and download them onto your machine.

## Standard Features

### POWER

Peak HP	Amps	Watts	Volts
3.8	15	1800	120

### CONTROL

- No-tend touchpad controls
- 30 preprogrammed blend cycles
- Blue LCD display showing profile and cycle count
- Customizable blend cycles

### FOOTPRINT

- Compact size fits in smallest spaces

### VERSATILITY

- Compatible with Blendtec's patented FourSide™, WildSide® and Twister™ jars

## Additional Options

### COUNTERTOP

- Can be used right out of the box with the included housing

### IN-COUNTER

- Can also be installed directly into your countertop

## More-Powerful Motor

#2 pencil  
(for scale)

1/2"

Typical blender  
motor (350 watts)

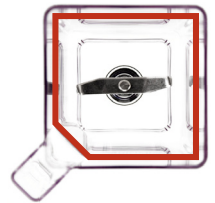

15-amp  
motor

1 3/4"

Blendtec motor  
(1800 watts)

## WildSide® Jar

The WildSide jar's patented fifth side shifts the blending vortex to achieve even thicker, faster blends—eliminating the need for a messy plunger.

## Stainless Steel Wingtip Blade

The ultra-hard stainless steel blade is cold-forged and tuned for heavy use. So it's stronger and lasts longer than lesser blades. Which is why it's warranted for the life of the jar.
